Biohazard Safety Training

Presented by Trauma Services

November 20

10:30 AM - 12:30 PM

**** Lunch Provided ****

TRAINING INFO

The Biohazard Safety Training Workshop will provide local government personnel with a working knowledge of the necessary steps to safely and correctly navigate bio-hazardous scenes.

Attendees will examine various types of bio-hazardous environments: the proper methods to assess risk; how to navigate safely within a bio-hazardous scene and what tools are necessary to properly mitigate bio-hazardous threats. All blood borne pathogens and biological/biohazardous threats will be touched upon including; HIV, Hepatitis, Tuberculosis, MRSA, hoarding situations, feces, bed bugs, chemical suicides, needle sticks, fentanyl etc. After the seminar, the participant will understand the necessary procedures to safely address a bio-hazardous situation.

Participants will receive a free PPE Kit at the conclusion of the workshop.
